

The strain-discovery layer your inventory already wins.

An inventory-overlap analysis and partnership proposal from CannaPickForMe.

The headline number

148 of 222 strains in the CannaPickForMe catalog (67% coverage) are SKUs Cookies Hayward already stocks. No other dispensary in our data comes close. That makes Cookies Hayward the natural anchor partner for the platform's launch.

Why we're writing

CannaPickForMe is a free strain-discovery app for adults 21+ in California. A user answers four short questions about mood and intensity, and the app surfaces a strain that matches. It is fully built and live at cannapickforme.com.

When we ran the catalog against our partner-dispensary data, Cookies Hayward stood out by a wide margin. 148 of our 222 strains are on your menu — including 33 Cookies-lineage hybrids and 22 strains rated 4.6 stars or higher. That is the deepest inventory overlap in the platform.

We are launching a charter partner cohort — five partners per placement tier — with pricing locked for twelve months. We would like Cookies Hayward to be the anchor Sponsored Strain partner.

The three hero strains we'd anchor on

These are the three SKUs that hit all three criteria: (a) you stock them, (b) they're rated 4.6+ in our catalog, (c) they're flagship Cookies-brand or Cookies-lineage genetics. They become your initial Sponsored Strain triplet.

Strain	Type	Rating	Genetics	Why it anchors
Girl Scout Cookies	Hybrid	4.6	OG Kush × Durban Poison	Brand namesake. Non-negotiable hero.
Gelato	Hybrid	4.6	Sunset Sherbet × Thin Mint GSC	Cookies-lineage flagship. Broad search demand.
Runtz	Hybrid	4.6	Zkittlez × Gelato	Modern Cookies-derivative. High purchase intent.

All three share the same dominant effect profile — Happy, Euphoric, Relaxed, Uplifted — which means our matcher's social, creative, and friends-night question pathways will surface your inventory at high frequency.

Charter pricing — Cookies Hayward

Standard charter rates from the partnership kit, applied to the Cookies Hayward configuration. Locked for twelve months from go-live. Cancel any month with 30 days' written notice.

Configuration	Monthly	What it covers
Sponsored Strain (recommended)	\$299	Your branded card surfaces when a user's match aligns with one of your 3 hero SKUs
Result + Sponsored bundle	\$399	Sponsored Strain on your 3 hero SKUs PLUS a Result Partner placement that runs on every other match
Result Partner only	\$199	Branded card on every post-match result. Doesn't tie to specific SKUs. Includes a Result Partner placement that runs on every other match

Our recommendation for the Hayward configuration is the bundle at \$399/mo — your hero SKUs surface on intent-matched results, and you also own the Result Partner slot on every other match. Given inventory depth, this is the highest-leverage option.

Honest framing on what we promise

- What we will not say:** We will not pitch you specific impression numbers or guaranteed in-store visits during the charter window. We are a charter-stage product.

What we will commit to in writing: Monthly placement reports drawn from real platform events, delivered by the 5th. 30-day cancel any month, no annual lock-in. If a metric is below threshold for meaningful interpretation in a given month, the report will say so. Quarterly creative refreshes plus free intra-quarter swaps for time-sensitive promos.

Compliance posture (one-line summary)

21+ age-gated. No purchase facilitation (we don't take orders, process payments for cannabis goods, or hold inventory). FDA-compliant disclaimers. Federal Schedule I acknowledgment. Cookieless analytics, no PII collected. Apple App Review Guideline 1.4.3 compliant.

The full compliance breakdown is in the standard partnership kit (page 6). Cookies' compliance team should be able to sign off without revisions.

Next steps — the cleanest path

1.

Discovery call (15 min)

Live product walkthrough on a screen-share. Pixel-level proof of where Cookies Hayward's SKUs surface.
2.

Mockup screenshot (within 48 hours)

Mockup rendered in the live app, anchored on Girl Scout Cookies, sent for sign-off before go-live.
3.

Charter agreement (1 page)

Pricing locked 12 months. 30-day cancel. Reporting commitments. Net-30 invoice or stored payment method.
4.

Go live (within 2 weeks of signature)

First monthly report by the 5th of the following month.
